

Introducing your own desktop post office

The new age **digital** franking machines powered by

POSTAGE^{BY}PHONE

Pitney Bowes Desktop Post Office

How would it feel to have a Post Office at your office desk? Pitney Bowes, the global leader in mailstream technology, brings you just that. The DM Series Digital Franking Machine, your desktop post office, is going to bring a revolution in terms of productivity, efficiency and saving precious time at your work place. Not just that, you can also earn a 3% discount on every franked mail*.

Designed with flexibility in mind, the DM Series Digital Franking Machine, powered by Pitney Bowes' IntelliLink™ technology represents the ultimate answer to the mailing needs of busy offices. The latest digital technology makes processing mail quiet and efficient – the perfect office solution.

How does it work?

Weighing mail

The DM Series Digital Franking Machine has a built-in scale that automatically weighs your mail and calculates postage in one easy step: just place mail on scale - the meter automatically weighs the mail and calculates postage rates for all classes of mail.

Printing postage

The DM Series Digital Franking Machine efficiently processes at the speed of 20 to 50 cycles / minute; to print postage, simply feed the mail piece into the slot. The meter automatically slides the mail piece through the print sleeve and prints postage. Use self adhesive tape sheet for bigger mails and your mail is ready.

Buying postage

Loading postage with your DM Series Digital Postage Meters is fast and simple and it takes just a few minutes to complete - First connect your meter to a phone line - Press "Add Postage" button and choose the amount of postages you want to buy - Postage will be refilled in just a few minutes.

Manage incoming mails

Track incoming mail

Date and time stamping on incoming mails ensures proper handling of the mail and records the received date and time on every mail piece.

Cost saving

No more overspending

Accurate electronic weighing with integrated weighing platform of 2.5kg for DM100i and DM130i and 5kg for DM140i.

Cost control

Accounts stored in the system enable postal spend to be broken down or allocated by cost center or department.

Future proof mailing

The onset of a liberalized market has resulted in a growing number of postal rate changes. IntelliLink™ is the cost effective way of accessing new postal rates just by simple downloading process, without having to purchase a rate prom.

Secured money

No more stamps or petty cash lying around the office as funds are securely downloaded and stored in the meter.

Appended solutions

Advertise for free

Transform standard mail shots into eye-catching communications – advertise your business on every mail piece in your slogan space with sharp inkjet printing to build professional image.

Print your office addresses

Printing a return address on the envelope ensures that undelivered mail is returned, so mail shots become more targeted and postal spend is reduced.

Offers more convenience

RMFS enabled by unique IntelliLink™ technology

The convenience of fast downloading of postal rate changes, access to software updates to prevent obsolescence and one touch postage refills via postage by phone - quick, secure, and hassle free.

Easy to use

All controls are fully integrated on one clear control panel with full English user-friendly instructions to guide the user through each stage of mail processing.

Reduced mail preparation time

Seal the envelopes while they are franked, resulting in professional and ready to post mail.

Advantages of digital technology over electronic meters

Digital Meters	Electronic Meters
Postage refilling from your desk via IntelliLink	Meter to be carried to post office for refilling
10 Memory jobs / Presets	4 Memory jobs / Preset
Inkjet cartridge- quick and easy replacement	Ink roller- messy refilling from ink bottle
Allows passage for articles up to max 9.25 mm thickness	Allows articles up to 6.35 mm thickness
Whisper quiet	Noise level 70 dbA
RMFS compliant	Not RMFS compliant
Integrated weighing scale	Optional Interfaced Scale
Choice of multiple downloadable slogans	Limited to one physical slogan
Auto dating – eliminates human error	Manual date adjustment
